

Why BBI injectors?

- Best manufacturing quality
- Symmetric nozzle spray
- Symmetric distribution of fuel into the combustion chamber
- Centric forces on the piston

→ **less wear of pistons and cylinders**

→ **Smoother running engine**

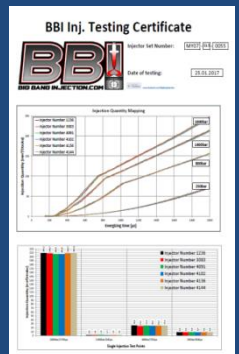

→ **No rattle**

→ **Low emissions**

→ **Better fuel economy**

- All injectors tested over the full operating range (to know how they will operate in the engine)
- Full injection quantity mappings provided with every injector set
- Over 500 test points are measured to deliver a single injector

- Best quality:
 - Low injector return rates
 - Injector failure rate <0.1%
